
MEMORANDUM

TO: Mayor Patrick Collins, and City Council
FROM: TJ Barttelbort, Purchasing Manager *TJB*
DATE: March 7, 2022
SUBJECT: Consideration to Purchase between the City of Cheyenne, and MED-ENG, LLC, for the purchase of two (2) Bomb Suits for the City of Cheyenne, Cheyenne Police Department

This is a single source purchase through MED-ENG, LLC, therefore no bids were requested. The MED-ENG, LLC Sole Manufacturer Statement is included for reference.

The City of Cheyenne, Cheyenne Police Department, was awarded a grant for the purchase of two (2) Bomb Suits, from a U.S. Department of Homeland Security Grant.

The bomb suit requested by the Cheyenne Police Department is a Sole Source product, manufactured and sold exclusively through MED-ENG, LLC.

The safety and functionality of the bomb suit is critical to the safety of the end user, and there are currently only two (2) bomb suits on the open market that are compliant with the NIJ 0117.01 Public Safety Bomb Suit Standard, Safety Certification (Certified Products List from Safety Equipment Institute, An Affiliate Of ASTM International) is included for reference.

The Cheyenne Police Department conducted research of both National Institute of Justice (NIJ) 0117.01 compliant bomb suits. Sergeant Zack Johnson (Cheyenne PD), along with Cheyenne Police Department Bomb Squad, conducted a review of the product offering from NP Aerospace, and concluded that there are several functions on the bomb suit that are not comparable to what MED-ENG, LLC is able to offer. For example, the bomb suit visor on the NP Aerospace helmet is very small, and does not appear to offer near the field of view that the MED-ENG, LLC EOD 10E Helmet offers. User visibility is critical while the suit is in use.

As this procurement is conducted via a Federal Grant, MED-ENG, LLC's active SAM.gov registration is included for reference. Additionally, pricing research was conducted via GSA Advantage and buying the product directly from MED-ENG, LLC is less expensive, than if purchased via a GSA Cooperative Contract.

The MED-ENG, LLC product has been recommended for approval by the City of Cheyenne Police Department, and is the basis for this request for Sole Source purchase. The total requested amount is for \$71,318.00 for the purchase of two (2) bomb suits, in accordance with the included vendor price quotation.

Funding: 025-21-2111-41-46528 (Federal Homeland Security Grant), Project #220020
\$71,318.00

REQUEST FOR SOLE/SINGLE SOURCE PURCHASE

DIRECTIONS:

Complete this form for all purchase requests with a sole/single source vendor. Send to the Purchasing Office before purchasing the item(s) along with the letter from the vendor indicating they are the sole/single supplier. **If over \$34,999.99, attach a copy of the legal ad and place on council.**

Name: Zack Johnson

Date: 02/12/22

Division/Department: Cheyenne Police Department Bomb Squad

ITEM DESCRIPTION: Two bomb suits (Personal Protective Equipment) with grant funding from Wyoming Homeland Security.

AMOUNT OF PURCHASE: \$71,318.00

STATE REASON FOR SOLE OR SINGLE SOURCE PURCHASE (CIRCLE ONE):

After a thorough review of available bomb suits, Bomb Technicians on the team all agreed that Med-Eng EOD 10 suits are the only one that meet our requirements and capabilities. Specifically, it is the only suit that meets standards for; fragmentation foot protection, helmet audio and hearing protection, drag rescue system, and electromagnetic interference and electromagnetic compatibility.

Signature of Requesting Individual: [Signature] P201

DIVISION/DEPARTMENT HEAD APPROVAL:

Name: [Signature]

Date: 2/15/22

Re: Sole Manufacturer Statement – Med-Eng Protective Equipment

This letter confirms that Med-Eng Holdings ULC, and Med-Eng, LLC (“Med-Eng”), is the sole manufacturer of Med-Eng branded personal protective equipment (PPE) for Explosive Ordnance Disposal (EOD) and blast related operations. This equipment includes but is not limited to the EOD 10E Bomb Suit and Helmet ensemble.

All manufacturing is conducted at our production facilities in Ogdensburg, New York, USA and in Pembroke, Ontario, Canada, or at a sub-contracted facility solely on behalf of Med-Eng.

The EOD 10E is distinguished by the following set of specifications for the protection, safety, operability, and stress mitigation of the EOD operator.

NIJ 0117.01 Certification - The EOD 10E is “Certified” to the NIJ 0117.01 Public Safety Bomb Suit Standard. Proof of certification includes being listed on the public website of the Safety Equipment Institute (SEI) certification body www.seinet.org.

Note: SEI is the only organization that can confirm certification. Self-certification is not possible. A manufacturer or vendor claiming their EOD suit and or helmet “is compliant”, “meets”, “passes” or “is tested to” the NIJ 0117.01 Standard in the absence of official certification are not acceptable substitutes for proof of certification.

Additional criteria that exceed the minimum requirements of the NIJ 0117.01 Standard are listed below and will serve to enhance the EOD technician’s blast protection, mission safety, fitment and operational efficiency.

Electromagnetic Interference and Electromagnetic Compatibility – The EOD 10E Suit and Helmet ensemble, in its base configuration, complies with the MIL-STD-461F and the Def-Stan 59-411 Class A Standards as listed in the following table, to limit both radiated electromagnetic emissions and susceptibility to electromagnetic radiation, as proven by documentation from an accredited NVLAP test facility.

EMC Compatibility	The EOD Suit and Helmet ensemble must be tested against the following frequency ranges from relevant military standards:
- Emissions to avoid the suit and helmet generating an electric field which can initiate an IED’s electronics.	US MIL-STD-461, sections:
	1. RE101, Radiated Emissions, Magnetic Field (30 Hz – 100 kHz)
	2. RE102, Radiated Emissions, Electric Field (2 MHz – 18 GHz)
	UK Def Stan 59-411, sections:
	1. DRE01.A Radiated Emissions Electric Field (88 MHz – 18 GHz)
-Susceptibility to shield the suit and helmet electronics	2. DRE02.A Radiated Emissions Magnetic Field (500 Hz – 250 kHz)
	US MIL-STD-461, section:
	1. RS103, radiated susceptibility, electric field (2 MHz – 18 GHz)
	UK Def Stan 59-411, sections:

from relevant external Radio Frequency influences, and to permit full operability.	1. DRS01.A Radiated Susceptibility Magnetic (H) Field (500 Hz – 100 kHz)
	2. DRS02.A Radiated Susceptibility Electric (E) Field (50 kHz – 18 GHz)

Helmet Audio and Hearing Protection – The EOD 10E Helmet includes stereophonic (left/right) integrated speakers built into the Helmet, with individually adjustable audio levels. The EOD 10E Helmet includes integrated protection against blast overpressure and audio noise in excess of 90 dBA. The noise level cut off threshold is adjustable by the user.

Enhanced Fragmentation Face Shield Protection – The EOD 10E Helmet face shield is compatible with an optional steel visor to enhance V50 fragmentation protection at the face level, beyond the minimum NIJ 0117.01 V50 requirements.

Fragmentation Foot Protection – The EOD 10E Suit includes 360-degree fragmentation protection to the foot and fits on American foot sizes of 6 to 14. The V50 level fragmentation protection is at least 450 m/s (1,475 feet/second) against the 17-grain (1.1 gram) Fragment Simulating Projectile (FSP). Documentation of this testing was conducted in accordance with the NIJ 0117.01 Public Safety Bomb Suit Standard.

Slip Resistance - The EOD 10E foot protection has slip resistance independently proven to provide a static coefficient of friction of 0.60 or greater, as tested in accordance with ASTM F 489, Standard Test Method for Static Coefficient of Friction of Shoe Sole and Heel Materials as measured by the James Machine, for dry conditions.

Personal Cooling System – As documented by an independent test facility, when tested in accordance with ASTM F2371-05 (sweating thermal manikin testing), the EOD 10E ensemble provides 70 W of integrated cooling over the torso for a minimum of 120 minutes on a single battery serving as its primary power supply, without adding any additional weight to the suit. In addition, the EOD 10E ensemble is compatible with an optional body cooling system providing at least 145 W of average cooling to the body for a duration of at least 60 minutes.

Warning Lights – The EOD 10E Helmet includes an LED mounted on the inside of the visor to notify and warn the operator of low battery level, connection problems, and other information in a manner not visible externally.

Voice Command System – The EOD 10E Helmet includes an integrated Voice Command System that is capable of operating in multiple languages, including American English, to control helmet and suit functions, including ventilation, lighting (on/off, color choice, and white light intensity), headphone volume, and external speaker (on/off and volume). The Voice Command System is interactive to facilitate usage.

Drag Rescue System – The EOD 10E Suit jacket includes an enhanced integrated drag rescue system, in addition to the NIJ minimum requirements of shoulder handles, with a central attachment point aligned with the spine to grasp a fallen EOD operator and drag them in a controlled manner to a safe location for medical assistance.

Med-Eng Holdings ULC
2400 St. Laurent Blvd.
Ottawa, ON. K1G 6C4
Canada
1-613-482-8835

Inflatable Helmet Liner – The EOD 10E Helmet includes an integrated inflatable helmet liner to fit the 5th percentile female to the 95th percentile male head sizes, as per the 2012 US Army anthropometric data.

Helmet Lighting – The EOD 10E Helmet includes integrated LED lighting in white, red and blue, powered by the suit's main power supply. Its White lights are adjustable in intensity and direction. The integrated lights remove the need for the operator to hold a flashlight, thereby freeing up the hands of the operator. Turning lights on and off, by color, is controlled by voice, to allow the operator to keep their hands free for other tasks.

Control Unit Capabilities – To facilitate the work and concentration of the EOD technician, the EOD 10E Control Unit provides the following functional capabilities:

- Display information for battery level, audio volume and fan speed
- Control audio volume
- Control fan speed
- Countdown Timer
- Stopwatch
- Display fault diagnosis to assist in electronics system maintenance
- Assign up to 4 pre-set user or environmental/mission profiles, such as stereophonic left/right speaker levels, to the electronics system to serve multiple team members who share a helmet

Standard Components

The EOD 10E ensemble includes the following components:

- Jacket with integrated ventilation, back protector and detachable chest/groin plate;
- Trousers with integrated yoke for trouser suspenders and an integrated waist cummerbund
- Foot Protection
- Helmet with visor, inflatable liner, integrated stereophonic speakers, microphone, and video camera mounting system

If you have any questions in this matter, please do not hesitate to contact your authorized Med-Eng representative.

Sincerely,

Richard Busbridge
EOD Product Line Director
