MEMO

To: Honorable Mayor Patrick Collins and Members of the City Council
From: Seth Lloyd, Planner
Subject: UDC-22-00274 / Harmony Valley, 3rd Filing – Preliminary Plat
Date: September 12, 2022

Background:

The item for consideration is a *Preliminary Plat*. This is approved by Acknowledgement.

The proposed Governing Body review schedule is as follows:

- Introduction and Referral 9/12/2022
- Public Services Committee 9/20/2022
- Final consideration 9/26/2022

Planning Commission Recommendation:

The Planning Commission heard this item at their September 6, 2022 meeting and recommended the Governing Body approve this application subject to Staff's recommended exceptions and conditions.

The Planning Commission Staff report is attached and has not been changed.

CITY OF CHEYENNE PLANNING COMMISSION SEPTEMBER 6, 2022 STAFF REPORT

FILE: UDC-22-00274: Harmony Valley, 3rd Filing Preliminary Plat

REQUEST: A Preliminary Plat of 69.3 acres proposing creating 395 residential lots

LOCATION: North of College Drive and south of Allison Road.

APPLICANT: Tru Grit Land Development, LLC

AGENT: CivilWorx, LLC – Justin Beckner

OWNER: Tru Grit Land Development

ZONING: PUD (ORD

PURPOSE: A preliminary plat of 69.3 acres of land for future residential development

PREPARED BY: Seth Lloyd, Planner

RECOMMENDED MOTION:

Move to **approve** the Harmony Valley, 3rd Filing Preliminary Plat, subject to staff conditions.

APPLICABLE CITY CODE SECTION(S) AND PLANS:

- UDC 2.1.2 Preliminary Plat Approval
- UDC Article 3 Impact Studies
- UDC Article 4 Subdivisions
- UDC Article 5 Zoning Regulations
- PlanCheyenne

BACKGROUND:

The applicant is requesting approval of a preliminary plat for a 69.3 acres of land to create a street network and lots for future residential development. The County Assessor presently shows the land as three ownership parcels. The land is developed with one rural-residential home.

SURROUNDING LAND USE AND ZONING:

	Future Land Use Designation	Zoning	Land Use
Subject Site	Urban Residential, Mixed-use Residential	PUD (ORD 4274)	Largely undeveloped – one rural residential house
North	Urban Residential, Mixed-use Commercial, Public and Quasi-public	P Public, MR Medium-density Residential	School, Single-family Residential, Undeveloped
South	Mixed-use Commercial, Public and Quasi-public	CB Community Business, MUB Mixed-use Business Emphasis	School, Commercial
East	Urban Residential	PUD (ORD 3597)	Single-family residential
West	Urban Residential, Mixed-use Residential, Public and Quasi-public	P, PUD (ORD 4274)	School, Single-family residential (developing)

The property is currently zoned as the Harmony Valley PUD (ORD 4274). This PUD encourages a residential development pattern focused on smaller, more compact single-unit development.

ANALYSIS OF APPLICATION CONFORMANCE WITH REVIEW CRITERIA:

Should the Planning Commission wish to recommend approval of the preliminary plat, the Commission must make the following findings required in UDC 2.1.2.d a detailed analysis is below:

1) The application is in accordance with the development policies and physical patterns identified in the Comprehensive Plan. (UDC 2.1.2.d.1)

On the future land use map found in PlanCheyenne, the subject land has been designated as Urban Residential and Mixed-use Residential. The Mixed-use Residential portion is at the southern side of the subject property.

Surrounding areas to the north and east are also designated Urban Residential. To the south and northeast, the future land use designation is Mixed-use Commercial. The Public and quasi-public designation is to the northwest and south.

The Urban Residential designation encourages a mix of residential development, and the proposed plat is consistent with this expectation. The Mixed-use Residential designation encourages a mix of commercial and residential development, focusing on residential development. The plat is also consistent with this development pattern.

Foundation 1 of PlanCheyenne encourages community growth. This development is in response to market demands and is within the Urban Service Boundary. The development patterns proposed by this plat are compatible with the designations found on the future land use map.

Foundation 7 of PlanCheyenne support the use of existing infrastructure and timely provision of services (including emergency and education services). This development is largely surrounded by existing infrastructure.

Other principles of PlanCheyenne encourage tying neighborhoods together and a compatible development pattern between neighborhoods. This development proposes tying into the surrounding neighborhoods to the extent possible.

The application **complies** with this review criterion.

2) The application reflects sound planning and urban design principles with respect to existing and potential future development in the vicinity, including consideration of current and future streets, open spaces, blocks and lots, and public utilities or facilities. (UDC 2.1.2.d.2)

The proposed plat is largely surrounded by existing developments. The land to the southwest is currently under development. Schools are located to the north and south. Although a platted right-of-way exists to the east, the final grading of the development to the east makes a street connection likely infeasible (a pedestrian connection may still be practical).

The application **complies** with this review criterion.

3) The division of land meets the purposes, intent, and all applicable standards in Article 4. (UDC 2.1.2.d.3)

Transportation Network:

This plat proposes connecting into York to the southwest at two points, to Allison to the north at two points, and utilizing the Grand Harmony street stub in the southeast. Although Medley Loop is platted to connect, a full street is unlikely due to topographic constraints (a pedestrian connection may still be feasible). Due to previous development, no other street connections are proposed.

Maximum and minimum block dimensions are established by the Unified Development Code. Blocks within this proposed subdivision do not meet the block standards put forth in the code; however, these blocks appear to qualify for exceptions due to the constraints in place. Due to the significant topographic change, Staff recommends that Blocks 1 and 2 qualify for the Natural Features exception. Block 4 is also oversized, but the maximum size is 2,200' and the block is just

over 2,300' in a topographically challenging area. Staff recommends that Block 4 be approved for an exception as well. Block 9 is also oversized, but the reason for this is the detention area and school located just to the south of the property. Much of this block appears to be reserved for detention/open space, so it may be possible to put a connection through this parcel should the school ever redevelop. Staff recommends this block also qualify for an exception. Block 15 appears to be slated for future platting, so block sizes on Block 15 will be analyzed with the future plat(s). All other blocks meet maximum size requirements.

Single tier blocks are generally prohibited, but may be allowed with specific City Council approval. Single tier blocks contain lots known as 'double frontage lots' or 'through lots' and are lots with frontages on two parallel streets – one street in the front and one in the rear of the lot. Lots of this nature can create issues with access, addressing, setbacks, and maintenance. In this plat, there are lots along York Avenue which fit this description (Block 3). The applicant has proposed that a Greenway be located along York Avenue. A Greenway is generally maintained by the City, so this may mitigate some of the potential maintenance issues. To mitigate some of the other issues presented by single-tier blocks, the applicant should provide a note to the plat prohibiting lots from being accessed off of York Avenue. The City Council may also "require additional design elements either in the right-of-way or easements to mitigate the adverse impacts of double frontage lots and blocks" (UDC 4.3.3.b.2).

Community Facility Fees:

Community Facility Fees are due with this plat. Plat fees will be due on the land that was originally platted as Interior Heights 4th Filing (no fees charged at the time of that plat due to AR zoning). This was roughly 20 acres (\$14,000 per UDC 4.2.5.b), but areas platted for streets and open space may be exempted (4.2.5.c), if the applicant can provide a calculation for rights-of-way within that area. For areas outside of Interior Heights 4th Filing, plat fees paid with Harmony Valley, 1st Filing can be credited to those due with this plat (and since plat fees have not changed since the 1st filing, no fees will be charged for that area). For fees based on acreage, the area of the plat is pro-rated to the nearest tenth of an acre. The required fees for the 20 acres associated with land in Interior Heights 4th Filing are as follows:

Land Acquisition Fee	\$7,000 (\$350 per acre)
Infrastructure Fee	\$7,000 (\$350 per acre)
Total Land Acquisition & Infrastructure Fees	\$14,000.00

Per UDC Section 4.2.5, Table 4-2, the Land Acquisition & Infrastructure fee are payable at the time of the signing of the final plat.

Residential Enhancement Fee \$400 per dwelling unit

Per UDC Section 4.2.5, Table 4-2, Enhancement Fees are payable at the issuance of a building permit for each structure.

Open Space:

Open space is required to be provided with this subdivision. Per the PUD, the Park requirement is being met by the park platted in 1st filing. The 8% other open space requirement in the PUD appears to be met in phase 1 and phase 2 (assuming the following lots are reserved as open space: Lot 1, Block 1; Lot 1, Block 2; Lot 41, Block 4; Lot 39, Block 9; Lot 11, Block 11; Lot 11, Block 12; Lot 11, Block 13; Lot 11, Block 14). Lots reserved for open areas should be noted as such on the plat.

Required Improvements:

This proposed subdivision included preliminary engineering drawings which showed the proposed utility and street layout.

The application **complies** with this review criterion, with conditions.

- 4) Any phasing proposed in the application is clearly indicated and demonstrates a logical and well planned development pattern. This may include consideration of amenities and public facilities of the subdivision within each phase compared to the anticipated timing or the likelihood of future phases being constructed as planned. (UDC 2.1.2.d.4)**

Phasing is proposed with this subdivision. The first phase largely just comes off of York Avenue. The second phase would connect into Grand Harmony, and possibly into Allison. Phase 2 may be required to provide an Allison connection for circulation purposes. Phase 3 is on the north side and still appears to be in design. The phasing scheme proposed is appropriate and logical, especially considering that the developer is actively constructing the development to the southwest.

The application **complies** with this review criterion.

- 5) The impacts identified in specific studies or technical reports that were prepared or requested to be prepared in association with the application, and whether the findings and recommendations of these reports, or any modifications or conditions on approval of the application, can mitigate these impacts. (UDC 2.1.2.d.5)**

The applicant submitted a drainage report and a traffic impact study. The applicant also submitted preliminary engineering plans (showing utility layouts), which prompted some discussion and comments that generally do not require modifications to the plat application. No other studies were provided with the Preliminary Plat application.

Drainage:

The review of the drainage report submitted with the preliminary plat generally found the drainage acceptable for this stage of review. Staff had specific comments regarding storm sewer inlets and the discharge rate, which will need to be addressed with subsequent submittals.

Traffic:

The traffic study submitted with the application identified a few off-site improvements which should be considered with this development, including turn lanes on College and the construction of a York-Cribbon connection. The review of the study also indicated that Grand Harmony and York should be designed and built as collector streets.

The application **complies** with this review criterion, with conditions.

- 6) Lots proposed for development shall be buildable lots according to the existing or proposed zoning district standards, result in design and development patterns that meet the Intent and Applicability statements of the existing or proposed zoning district, and not aggravate nonconforming setbacks or currently adopted building and fire code access and separation requirements. (UDC 2.1.2.d.6)**

The area outside of Block 15 on this plat is designated “MDR” by the PUD. The PUD encourages smaller single-family units and attached units in the MDR portion. This plat meets this expectation.

All lots proposed for development meet the standards of the PUD. According to the PUD, ‘detached’ development requires 3,000sqft of lot area, therefore the following lots will be limited to ‘attached’ development (duplex or townhome):

- All Lots on Block 1 except Lot 9.
- All Lots on Block 2.
- Lots 2-5, and 40 on Block 4.
- Lot 29, Block 5.

Staff is unsure if Lot 40, Block 4 and Lot 29, Block 5 are intended to be so limited. A revised plat to add square footage to these two lots could allow them to be detached homes.

It appears the following lots are reserved as open space (and/or detention): Lot 1, Block 1; Lot 1; Block 2; Lot 41, Block 4; Lot 39, Block 9; Lot 11, Block 11; Lot 11, Block 12; Lot 11, Block 13; Lot 11, Block 14. Lots reserved for open areas should be noted as such on the plat.

Block 15 appears to be a placeholder for future development. The analysis of development patterns on Block 15 will occur with subsequent platting applications.

The LR zone is intended to develop with a mix of lower-density, suburban residential development. The MUB zone is intended to develop with a diverse mix of residential, retail, service, employment and civic uses integrated into a walkable compact development pattern. The CB zone is intended for Retail, Employment, Service and Civic uses that may serve a number of residential neighborhoods. The general development patterns proposed meet the intent and applicability of their respective zone districts.

The application **complies** with this review criterion, with conditions.

- 7) All parcels not proposed as buildable lots and which are not dedicated to and accepted by the City shall have a clearly defined entity responsible for ongoing maintenance. (UDC 2.1.2.d.7)**

It appears the following lots are reserved as open space (and/or detention): Lot 1, Block 1; Lot 1; Block 2; Lot 41, Block 4; Lot 39, Block 9; Lot 11, Block 11; Lot 11, Block 12; Lot 11, Block 13; Lot 11, Block 14. These lots should be so designated and have a maintenance agency identified. There is an identified maintenance agency identified in Harmony Valley, 1st filing, so an extension of that agency to these lots would be expected.

The application **complies** with this review criterion, with conditions.

- 8) The application will not create any undue influence on existing or potential development for adjacent property considering the existing zoning and Comprehensive Plan policies for that property. (UDC 2.1.2.d.8)**

Surrounding properties are largely already developed or actively developing. This plat is an infill project which connects to all surrounding developments to the extent feasible. The residential development pattern proposed is consistent with the development patterns of surrounding residential areas.

The application **complies** with this review criterion.

- 9) The application is not harmful to the public health, safety, and welfare. (UDC 2.1.2.d.9)**

Staff is satisfied that the proposed plat is not harmful to the public, health, safety, or general welfare.

The application **complies** with this review criterion.

- 10) Remainder lot(s) shall be clearly identified on the preliminary plat and shall not be developed or proposed for development for purposes. Remainder lot(s) shall be noted and described on all plats either graphically or by legal description. (UDC 2.1.2.d.10)**

Remainder lots do not appear to be proposed with this Preliminary Plat.

The application **complies** with this review criterion.

CONFORMANCE WITH APPLICABLE PLANS:

The project is located in an area covered by the following plans:

- PlanCheyenne

Conformance with PlanCheyenne is covered by review criterion 1.

STAFF REVIEW:

Through the review process, comments were received regarding the following issues:

1. Open Space lot designation
2. Drainage inlet issues
3. Traffic Study recommendations
4. Street designations
5. Technical corrections
6. Block requirements (double-fronted and oversize)

CONCLUSION:

This application meets review criteria with some minor clarifications and technical corrections. Exceptions will need to be granted due to the constraints of previous development and topography.

ALTERNATIVES:

1. Recommend approval of the preliminary plat as submitted by the applicant.
2. Recommend approval of the preliminary plat subject to staff's recommended conditions (**Staff Recommendation**).
3. Recommend denial of the preliminary plat based on findings of denial. The Planning Commission must conclude that the plat does not meet all the review criteria. As part of the motion, findings for denial must be stated.
4. Postpone the preliminary plat until issues identified during the meeting can be resolved.

General Information Regarding Alternatives:

The Planning Commission may modify staff's recommended conditions, delete conditions, add conditions, or decide contrary to staff's recommendation. In the event conditions are modified, the conditions shall relate to applicable review criteria. In the event that the Commission acts contrary to staff's recommendation or modifies conditions of approval, the Commission shall cite specific reasons (based on the review criteria) for approval or denial.

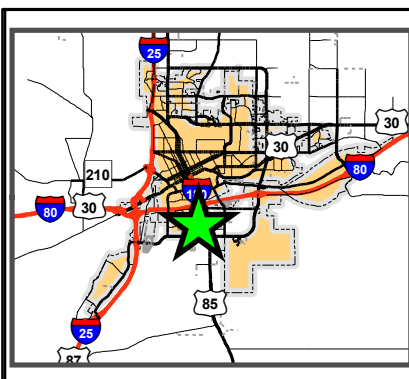

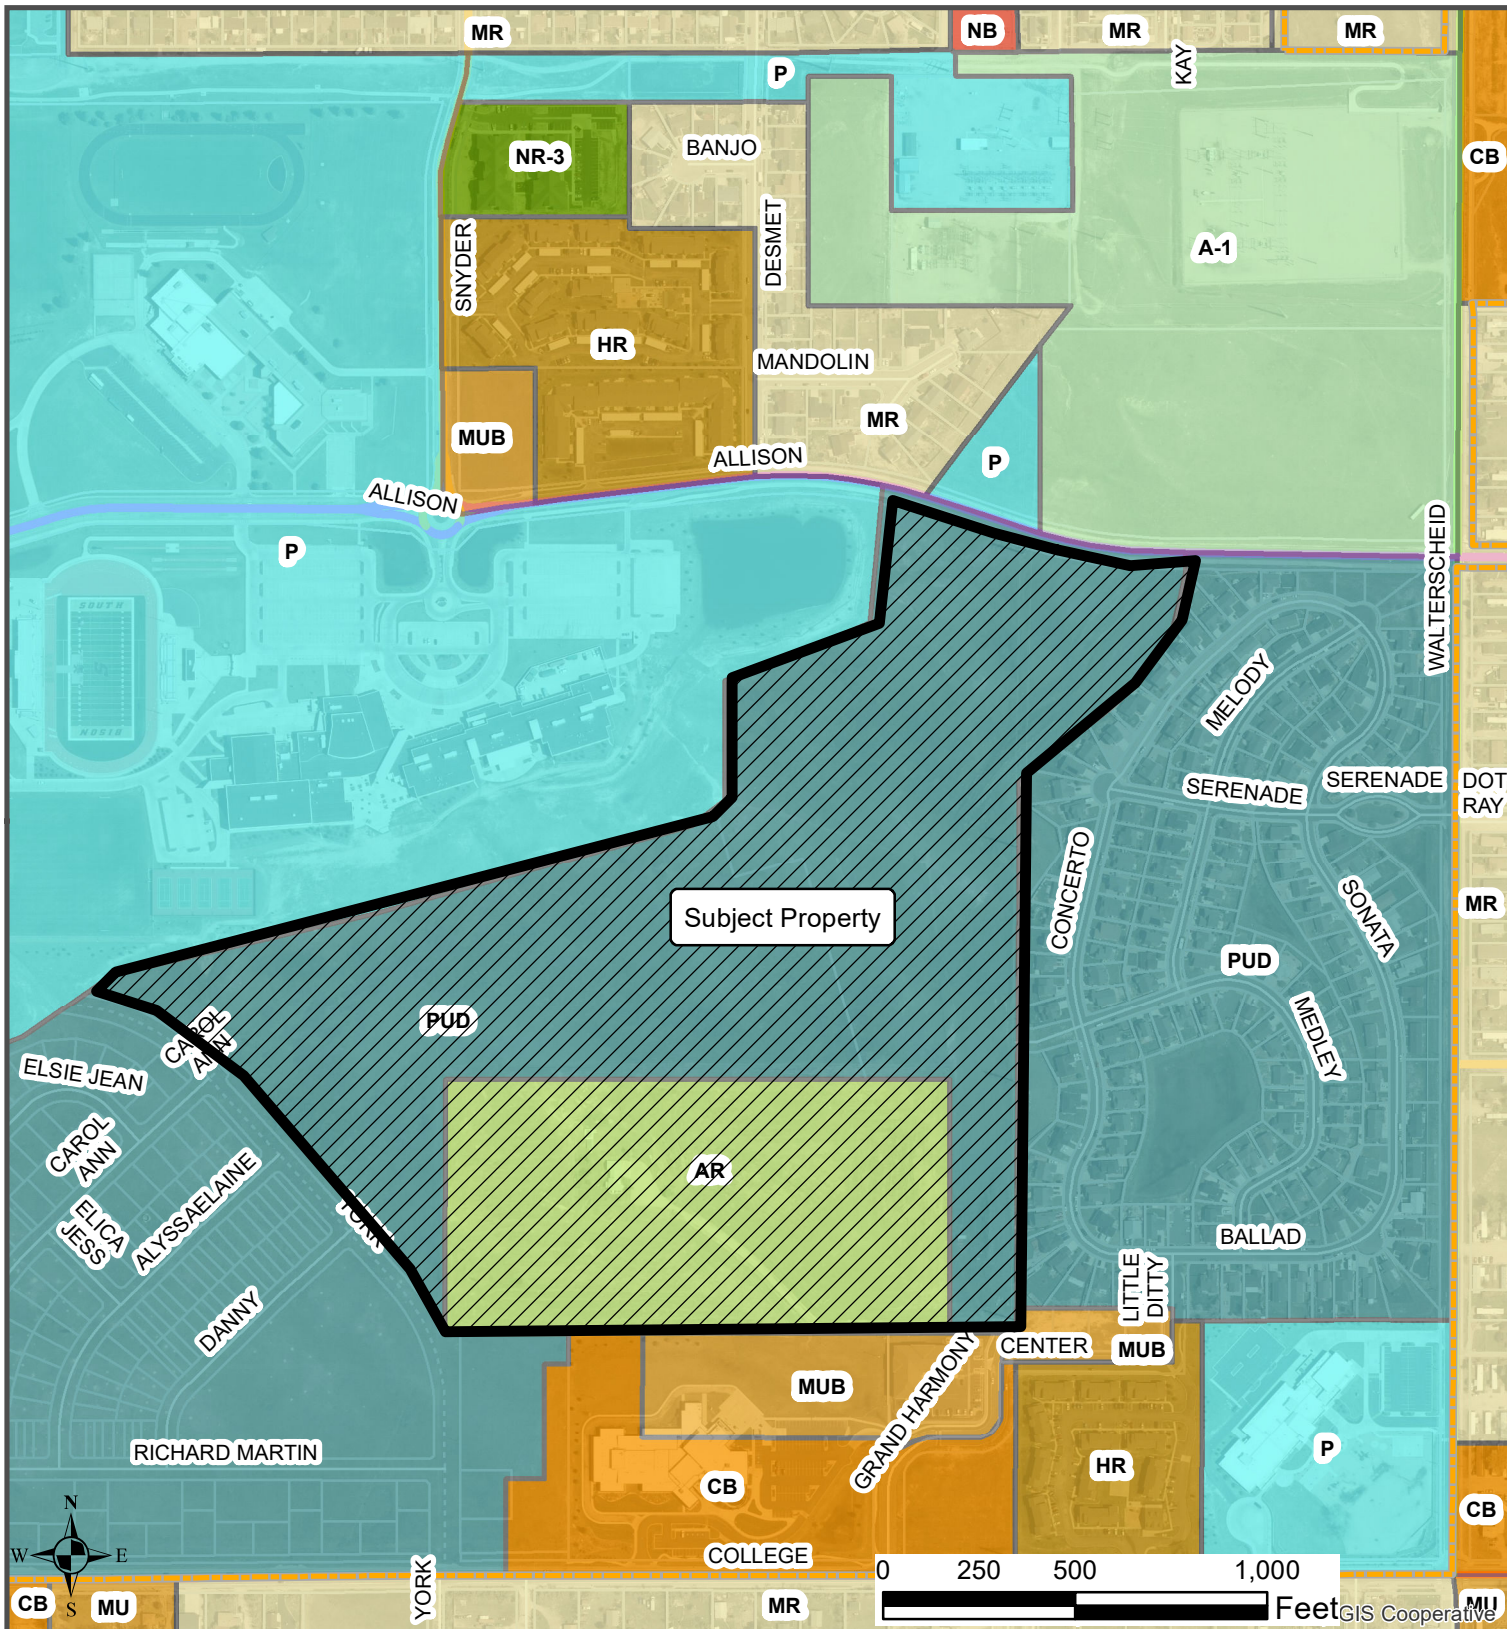

STAFF RECOMMENDATION:

Staff recommends approval of this application, with the following exceptions and conditions:

1. The following exceptions to are granted:
 - a. Exception to UDC 4.3.3.c, regarding minimum block size and connectivity for Blocks 1, 2, 4, and 9.
 - b. Exception to UDC 4.3.3.b.2, regarding double-fronted lots for Block 3.
2. Concurrent with final plat submittal:
 - a. Submit updates to technical studies to the satisfaction of Staff for a final plat submittal
 - b. Submit an updated Letter of Authorization
3. Correct the plat as follows:
 - a. Provide notes and/or labels for any open space lots and the maintenance agency for each.
 - b. Resize all lots intended for detached dwellings to meet minimum area requirements.
 - c. Label all lots (Lot 32, Block 10 is missing a label on the Preliminary Plat).
 - d. Include a street suffix for "Grand Harmony" (the street is "Grand Harmony Blvd" to the south).

ATTACHMENTS:

HARMONY VALLEY THIRD FILING
PRELIMINARY PLAT

CITY OF CHEYENNE,
LARAMIE COUNTY, WYOMING

GENERAL NOTES

- 1.) THE PLATTED AREA DOES NOT FALL WITHIN A FEMA SPECIAL FLOOD HAZARD AREA AS OF THE RECORDING DATE OF THIS DOCUMENT.
- 2.) NEW UTILITY EASEMENTS ALONG STREETS ARE 10' WIDE UNLESS OTHERWISE NOTED.
- 3.) DISTANCES SHOWN ON PLAT ARE GROUND DISTANCE.

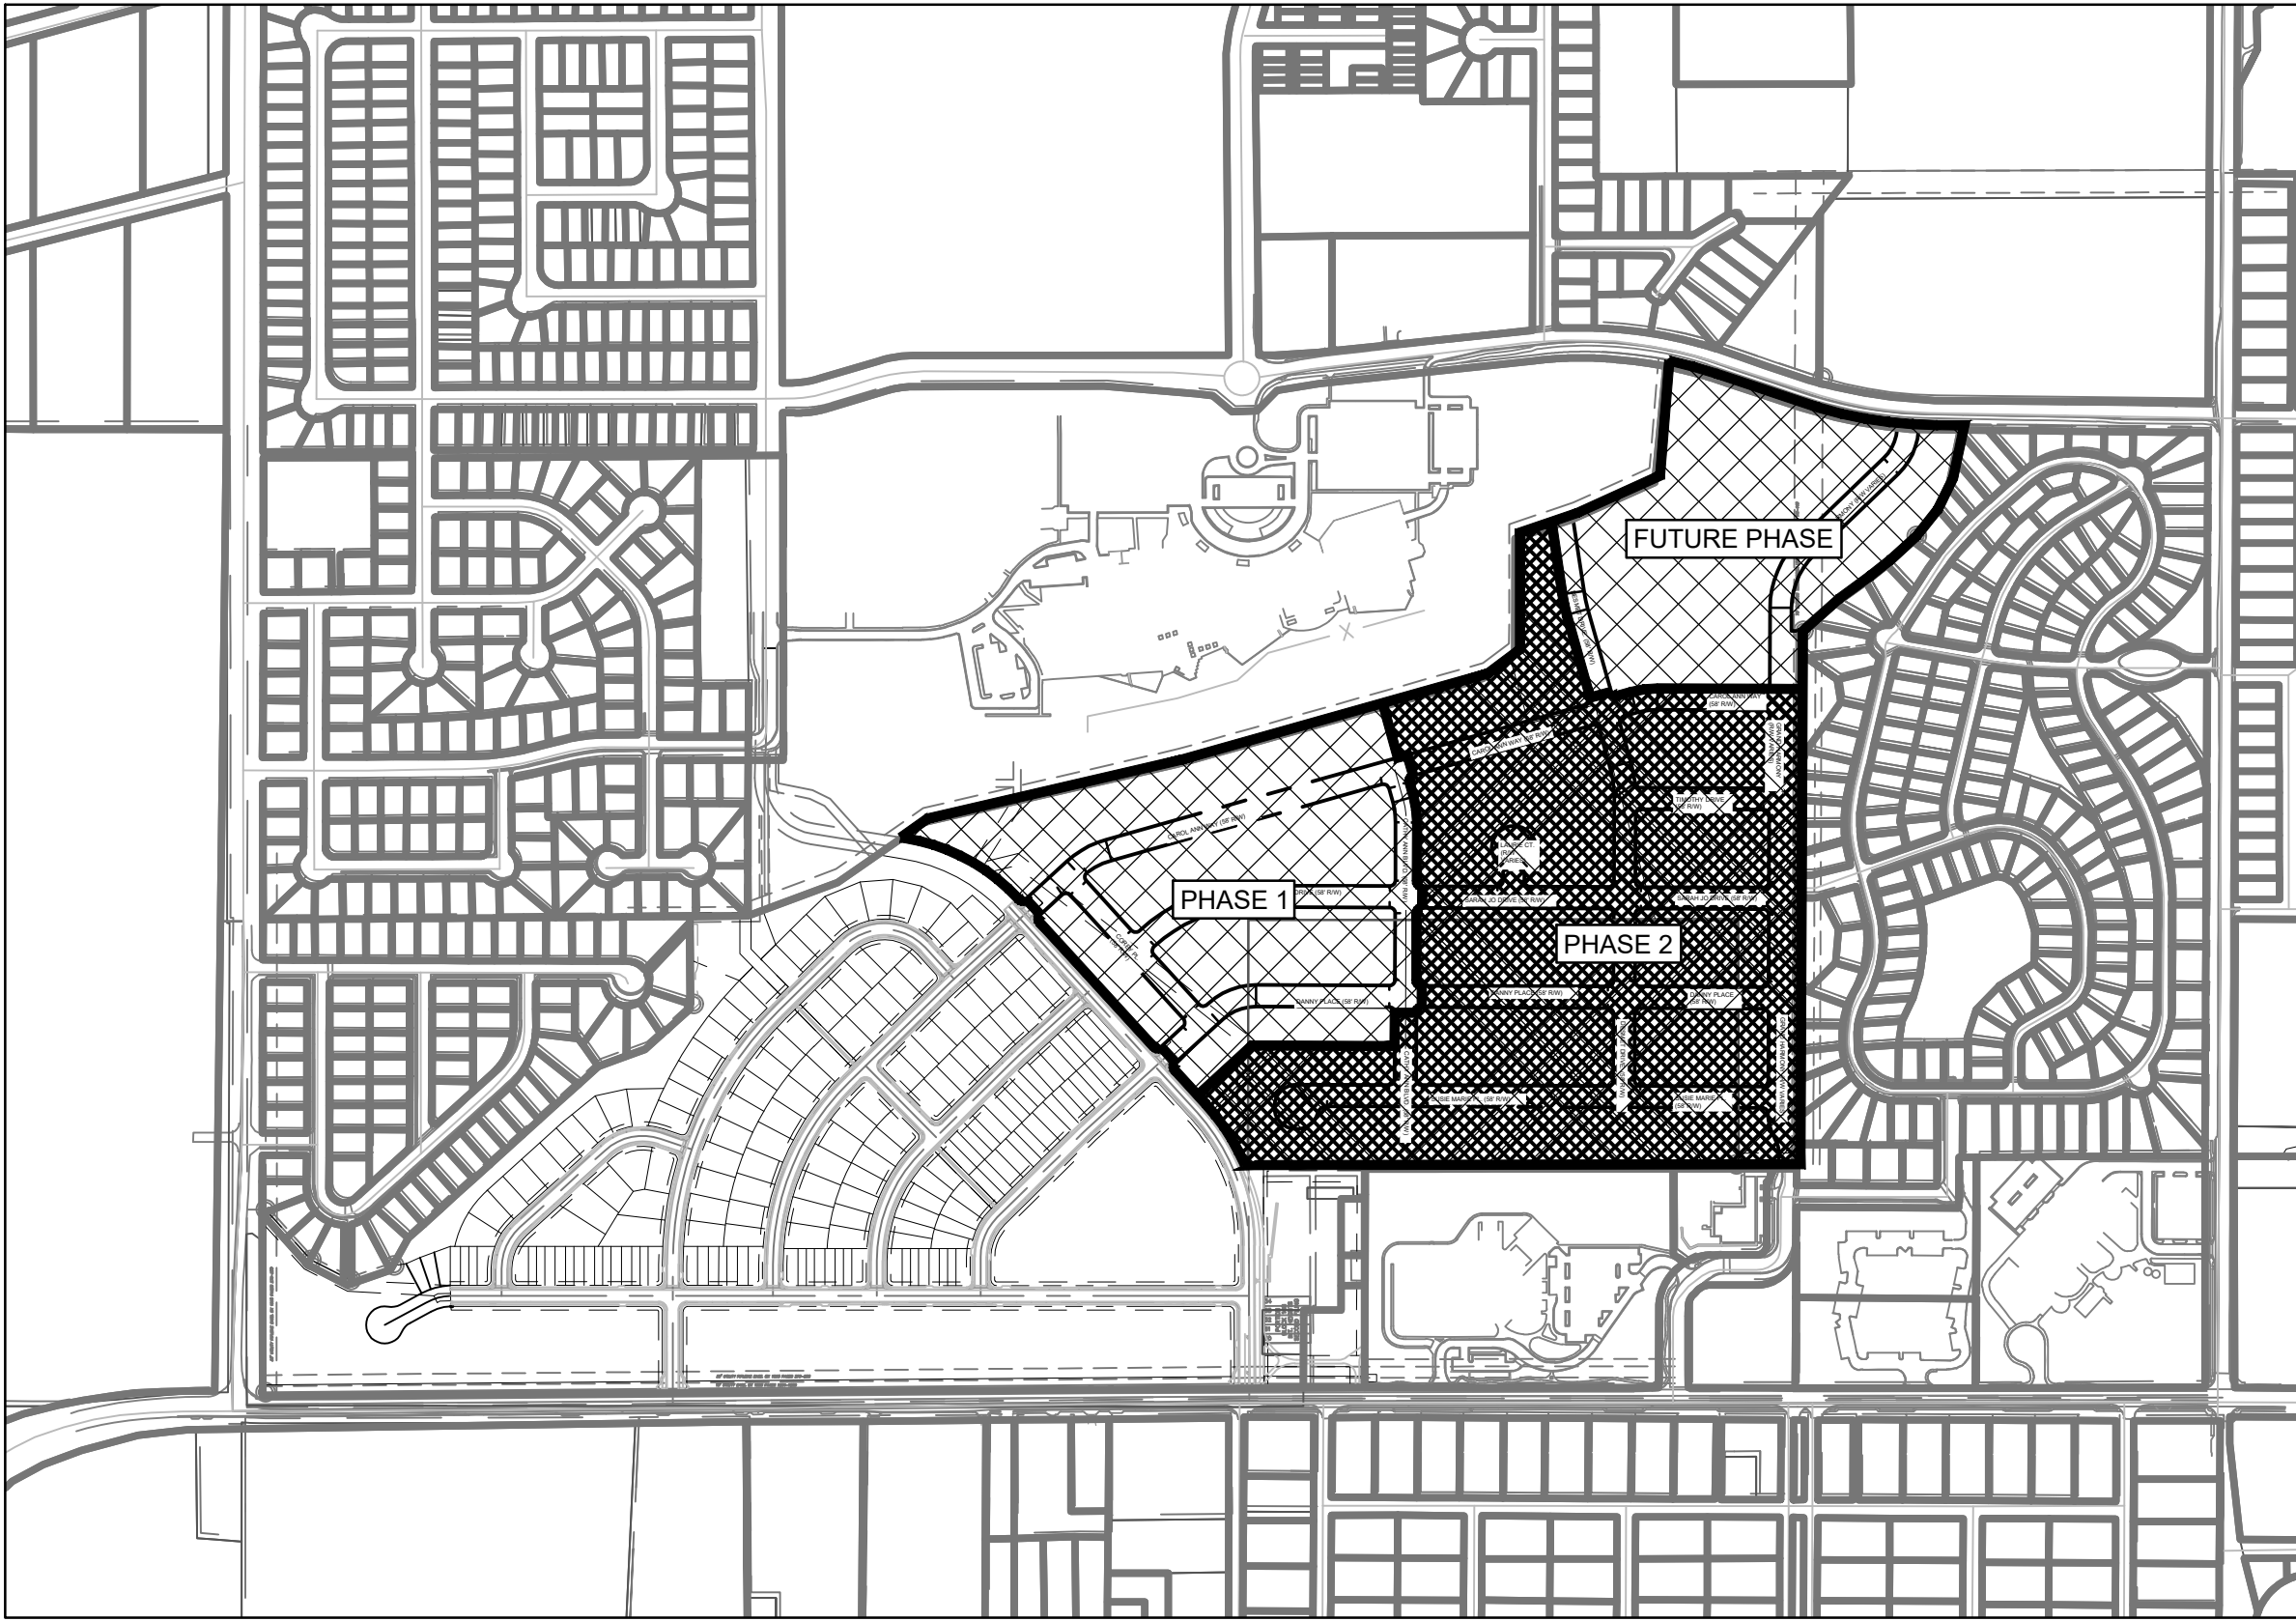

OPEN SPACE:

OPEN SPACE WILL BE PROVIDED FROM LOT 1, BLOCK 7 OF HARMONY VALLEY FIRST FILING AS STATED IN THE HARMONY VALLEY P.U.D.

PROPOSED ZONING: P.U.D. (ALL LOTS)
