

A COMMUNITY OF CHOICE

CITY ENGINEER'S OFFICE
2101 O'Neil Avenue
Cheyenne, Wyoming 82001

MEMO

TO: Honorable Mayor Patrick J. Collins, City of Cheyenne
Members of the City Council, City of Cheyenne

FROM: Wesley D. Bay, P.E., Deputy City Engineer

DATE: October 10, 2022

SUBJECT: Professional Service Agreement between the City of Cheyenne and AVI P.C., for the design of the Powderhouse Road and Carlson Street Intersection Project.

Please find the attached Professional Service Agreement between the City and AVI P.C. for engineering services related to the design of the Powderhouse Road and Carlson Street Intersection Project. The design will provide a vertical realignment of Powderhouse Road and Carlson Street to better accommodate ADA facilities and include the addition of signals warranted by the opening of a 5-6 elementary school east of the intersection.

Engineering Staff evaluates fee proposals for engineering services based on time and material estimates for the specific project. Those costs are readily tracked and verified during design operations and the City only pays for the actual time expended. We believe this agreement will provide the required services to complete the design portion of the project.

The fees include services for project management, intersection re-design, topographical surveying, geotechnical investigations, utility investigation, traffic signal design, and plan creation. Funding for this project will come from the 2018 1% Specific Purpose Tax Fund (5th Penny). The total professional services will be a cost not-to-exceed \$189,932.50. We respectfully request your approval of this professional services agreement.

City Contract No. _____

PROFESSIONAL SERVICES AGREEMENT
for
Powderhouse Road and Carlson Street Intersection Project

THIS AGREEMENT is made and entered into this _____ day of _____, 2022, by and between the City of Cheyenne, located at 2101 O'Neil Avenue, Cheyenne, Wyoming 82001 ("City"), and AVI, P.C., 1103 Old Town Lane, Suite 101, Cheyenne, WY 82009 ("Consultant").

RECITALS

In consideration of the mutual covenants and obligations herein expressed, it is agreed by and between the parties as follows:

1. **SCOPE OF WORK**

The Consultant agrees to provide services as described for the above-mentioned project, in accordance with the Scope of Work attached hereto as Exhibit A, incorporated by reference, and expressly made a part hereof.

2. **TIME OF PERFORMANCE**

This Agreement shall commence on the date the last required signature is attached hereto and shall continue in full force and effect until the scope of work is completed in accordance with Exhibit A, unless this Agreement is earlier terminated pursuant to its provisions.

3. **COMPENSATION**

In consideration of the services to be performed pursuant to this Agreement, the Consultant will bill the City and the City agrees to pay Consultant a not to exceed amount of One-Hundred Eighty-Nine Thousand Nine-Hundred and Thirty-Two Dollars and Fifty Cents (\$189,932.50).

4. **CONSULTANT RESPONSIBILITY**

In providing services under this Agreement, the Consultant shall perform in a manner consistent with that degree of care and skill ordinarily exercised by members of the same profession currently practicing under similar circumstances. Upon notice to the Consultant, the Consultant will, without additional compensation, correct those services not meeting such a standard.

5. **COMPLIANCE WITH LAWS**

The Parties agree that they will perform their obligations as provided in this Agreement in accordance with all applicable laws and ordinances.

6. **DRUG-FREE WORKPLACE**

In compliance with the Drug-Free Workplace Act of November 1988, the City of Cheyenne has established an Alcohol and Controlled Substance Policy that pertains to alcohol and drug usage by City Employees. All architects, engineers, and other consultants under

contract with City of Cheyenne, and their employees and sub-consultants, are required to comply with the provisions of the City's Alcohol and Controlled Substance Policy for drug and/or alcohol usage on City property or other sites occupied by the Consultant while performing the duties and responsibilities of the Agreement. It is the responsibility of the Consultant to familiarize themselves with the requirements of this policy and to inform all their employees and sub-consultants of the requirements and ensure their compliance. If the Consultant, their employees, or sub-consultants are found in violation of this policy, the Agreement may be terminated.

7. INDEMNIFICATION/HOLD HARMLESS

The Consultant agrees to indemnify, hold harmless and defend the City from and against any and all liabilities, claims, penalties, forfeitures and suits, and the cost and expenses incident thereto, including reasonable attorney's fees, which may hereafter arise as a result the performance of the Consultant's duties, including death or bodily injury to any person, destruction or damage to any property, contamination of or adverse effects on the environment, or any violation of governmental laws, regulations or orders to the extent caused by (1) the Consultant's breach of any term or provision of this Agreement; or (2) any negligent or wrongful act, error or omission by the Consultant, or its employees or sub-consultants in the performance of this Agreement. The Consultant acknowledges that it may incur a financial obligation to the City pursuant to the terms of this paragraph.

8. INSURANCE REQUIREMENTS

The Consultant must provide proof of the following insurance coverages:

Commercial General Liability Insurance

For claims arising out of bodily injury, illness, or death, or from damage to or destruction of property of others, including loss or use thereof, with minimum limits of \$1,000,000 per occurrence, \$2,000,000 aggregate for the entire term of the Agreement.

Workers' Compensation

Workers' compensation coverage shall be in effect for the entire term of the Agreement, as required by Wyoming law, for all employees or agents providing services under this Agreement. Consultant shall provide the City with proof of workers' compensation or employer's liability insurance coverage.

Professional Liability Insurance

The Consultant shall provide proof of professional liability insurance or errors and omissions liability insurance in an amount not less than \$500,000 to protect the City from any and all claims arising from the Consultant's negligence in the performance of duties under this Agreement. The City prefers that this liability insurance coverage be provided pursuant to an "occurrence" policy.

If this coverage is provided pursuant to a "claims made" policy:

- a. Consultant shall, concurrently with the execution of this Agreement, provide the City with a certificate of insurance demonstrating that such coverage is or shall be in effect at the time the Consultant begins the provision of services under this Agreement; and
- b. In the event the Consultant's services extend into a future policy period, the Consultant shall, prior to the policy expiration date, provide the City with a new certificate of insurance demonstrating that such coverage is or shall be in effect during all periods of time that Consultant will provide services under this Agreement; and
- c. Consultant shall maintain said "claims made" coverage for a period of five (5) years following the last date that Consultant has provided services under this Agreement; and
- d. In the event the Consultant or the insurer terminates "claims made" coverage prior to the expiration of the periods provided in subparagraphs a., b., or c. of this paragraph, the Consultant shall provide to the City advance written notification of the termination of said coverage and shall provide the City with an endorsement for an extended reporting period ("tail coverage") which shall be in effect for a period of time not less than five (5) years following the last date that Consultant has provided services under this Agreement.

Additional Insurance Information

The Consultant shall name the City of Cheyenne as **an Additional Insured** by endorsement on its insurance policies and shall provide the City with a copy of the endorsements. This requirement does not apply to workers' compensation and professional liability insurance policies.

Consultant shall provide the City with certificates of insurance acknowledging the above-stated coverages prior to beginning any work under this Agreement.

It is understood and agreed that these policies are primary and not contributory. All policies required under this Agreement shall be in effect for the duration of the Agreement. It shall be an affirmative obligation upon Consultant to immediately notify in writing the city risk manager, city clerk, and city attorney of any fact, circumstance, or occurrence that has resulted in or may result in the cancellation of, or substantive change to any insurance coverage required by this Agreement, and failure to do so shall be construed to be a breach of this Agreement.

If requested by the City, the Consultant shall provide the City with copies of insurance policies and/or policy endorsements listing the City of Cheyenne as an additional insured. The City's failure to request or review such policies, endorsements, or certificates shall not affect the City's rights or Consultant's obligation hereunder.

Any insurance company providing coverage under this Agreement shall have a minimum A. M. Best rating of A- (excellent).

9. MINORITY AND DISADVANTAGED BUSINESS ENTERPRISES 49 C.F.R. Part 26

All parties to this Agreement assure that no person will be excluded from participation in, denied the benefits of, or otherwise discriminated against, in connection with the award and performance of this Agreement on the grounds of age, race, color, disability, national origin or sex.

10. MONTHLY REPORT

With every monthly billing, Consultant shall provide the City Representative with a written statement of the status of the work with respect to the Scope of Work, time sheets, and work schedule. Failure to provide the required monthly report will delay processing of any payment request until the report is submitted.

11. INDEPENDENT CONSULTANT

The Consultant shall function as an independent consultant for the purposes of this Agreement. The Consultant shall assume sole responsibility for any debts or liabilities that may be incurred by the Consultant in fulfilling the terms of this Agreement. Nothing in this Agreement shall be interpreted as authorizing the Consultant or its agents or employees to act as an agent or representative of or on behalf of the City or to incur any obligation of any kind on the behalf of the City.

12. TAXES

The Consultant agrees to pay all valid taxes, excises, license fees, permit fees, bills, debts, and obligations incurred by and in connection with its operations under this Agreement.

13. DEFAULT

Each and every term and condition in this Agreement shall be deemed to be a material element of the Agreement. In the event either party should fail or refuse to perform according to the terms of this Agreement, such party may be declared in default.

14. REMEDIES

In the event a party has been declared in default, such defaulting party shall be allowed a period of fifteen (15) days within which to cure the default. In the event the default remains uncorrected, the non-defaulting party declaring default may elect to:

- a. Terminate the Agreement and seek damages, which damages shall not exceed the contract amount; or
- b. Treat the Agreement as continuing and require specific performance.

15. TERM AND TERMINATION

The term of this Agreement shall be from the date of execution and continue until the scope of work is completed in accordance with Exhibit A. The parties may by mutual written agreement renew or extend this Agreement. The City may, without cause, and upon thirty days' written notice to the Consultant, terminate this Agreement in whole or in part at any time, for the City's convenience. Upon receipt of such notice, the Consultant shall:

- a. Discontinue all services affected; and
- b. Deliver to the City within five (5) days all data, drawings, specifications, reports, estimates, summaries, and such other information and materials as may have been accumulated by the Consultant in performing this Agreement, whether completed or in process.
- c. In the event of termination for convenience, the City will pay the Consultant for accepted work done and expenses incurred to the date of termination. Such acceptance shall not be unreasonably withheld.

16. ADDITIONAL REMEDIES

In the event the Consultant fails to strictly perform in accordance with this Agreement, the City may elect to correct the deficiencies and charge the Consultant. In the event of default of any of the conditions by either party which shall require the party not in default to commence legal or equitable action against the defaulting party each party shall bear its own costs and expenses, including without limitation, attorney's fees.

17. GOVERNING LAW, JURISDICTION AND VENUE

The construction, interpretation and enforcement of this Agreement shall be governed by the laws of the State of Wyoming. The courts of the State of Wyoming shall have jurisdiction over any action arising out of this Agreement and over the parties, and the venue shall be the First Judicial District, Laramie County, Wyoming.

18. GOVERNMENTAL IMMUNITY

The City of Cheyenne, along with its officials and employees, does not waive its governmental immunity by entering into this Agreement, except to the extent necessary for the parties to pursue a contract action to clarify or enforce the written terms of the Agreement. Furthermore, the City specifically retains all immunities and defenses available to it as a sovereign or governmental entity pursuant to Wyo. Stat. § 1-39-101, *et seq.*, and all other relevant state and federal law. Designations of venue, choice of law, enforcement actions, and similar provisions should not be constructed as a waiver of governmental immunity. The parties agree that any ambiguity in this Agreement shall not be strictly construed, either against or for either party, except that any ambiguity as to governmental or sovereign immunity shall be construed in favor of governmental immunity.

19. MONITORING ACTIVITIES

The City shall have the right to monitor all activities related to this Agreement that are performed by the Consultant or its sub-consultants. This shall include, but not be limited

to, the right to make site inspections at any time and with reasonable notice; to bring experts and consultants on site to examine or evaluate completed work or work in progress; to examine the books, ledgers, documents, papers, and records pertinent to this Agreement; and to observe personnel in every phase of performance of the related work.

20. OWNERSHIP OF DOCUMENTS AND WORK PRODUCT

All deliverables by the Consultant, all work product of the Consultant, all notes, calculations, memoranda, or any other documentation generated by the Consultant pursuant to the scope of this Agreement, shall be the property of the City of Cheyenne and shall be provided to the City of Cheyenne immediately upon request.

21. NON-DISCRIMINATION

The Consultant shall comply with the Civil Rights Act of 1964, the Wyoming Fair Employment Practices Act (Wyo. Stat. § 27-9-105, *et seq.*), the Americans With Disabilities Act (ADA), as amended, 42 U.S.C. § 12101, *et seq.*, and the Age Discrimination Act of 1975 and any properly promulgated rules and regulations thereto, and shall not discriminate against any individual on the grounds of age, sex, creed, color, race, religion, national origin, ancestry, pregnancy or qualifying disability in connection with the performance under this Agreement.

22. FORCE MAJEURE.

The performance of the Agreement by either party shall be subject to force majeure including, but not limited to, acts of God, fire, flood, natural disaster, war or threat of war, acts or threats of terrorism, civil disorder, unauthorized strikes, governmental regulation or advisory, recognized health threats as determined by the World Health Organization, the Centers for Disease Control, or local government authority or health agencies (including, but not limited to, the health threats of COVID-19, H1N1, or similar infectious diseases), curtailment of transportation facilities, or other similar occurrence beyond the control of the parties, where any of those factors, circumstances, situations, or conditions or similar ones prevent, dissuade, or unreasonably delay the performance required by this Agreement. The Agreement may be cancelled by either party, without liability, damages, fees, or penalty, and any unused deposits or amounts paid shall be refunded, for any one or more of the above reasons, by written notice to the other party.

23. PROFESSIONAL REGISTRATION

The Consultant shall endorse, as required by law, plans and reports prepared under this Agreement, and shall affix thereto his or her seal of professional registration, showing that he or she is licensed to practice in the State of Wyoming, if necessary.

24. ENTIRETY OF AGREEMENT

This Agreement consisting of seven (7) pages and Exhibit A consisting of twenty (20) pages contain the entire understanding of the parties. There are no other terms or conditions, written or oral, concerning or controlling this matter.

IN WITNESS WHEREOF, the parties have hereunto set their hands and seals the day and year first above written.

PROPOSAL FOR THE CITY OF CHEYENNE, WYOMING
AVI PROFESSIONAL CORPORATION

**Carlson Street and Powderhouse Road
Intersection Design**

Thursday, September 29, 2022

#22.121

Wesley D. Bay, P.E.
Deputy City Engineer
City of Cheyenne, WY
2101 O'Neil Avenue
Cheyenne, WY 82009

VIA EMAIL: wbay@cheyennecity.org

RE: PROPOSAL FOR CARLSON STREET AND POWDERHOUSE ROAD INTERSECTION DESIGN

Dear Mr. Bay,

AVI is pleased to submit the following proposal for engineering services for the above referenced project. This proposal follows the scope of services provided in the "Professional Services Agreement" dated August 26th, 2022, with revisions or alternations based on the site visit with yourself, Ben Weaver (Stantec) and Tristan Cordier (AVI) on September 28th, 2022.

As you are aware, AVI and Stantec are currently working together to provide professional services for the Powderhouse Road Corridor Study. We believe we are well-positioned to complete this scope of work efficiently.

We understand the City of Cheyenne is in need of professional services to complete the design work associated with the proposed reconstruction of the Carlson Street and Powderhouse Road intersection. The proposed Project, including construction, is required to be completed by opening day of the new Coyote Ridge Elementary School. We understand this timeframe to be at the beginning of January 2024.

The existing topography of the intersection does not currently provide for adequate ADA crossings and accessibility. This is in part due to the profile elevation of Powderhouse Road. To mitigate this issue, AVI proposes to broadly assess four differing scenarios, and then work with the City of Cheyenne to select the most optimal scenario with which to continue. The four different scenarios are as follows:

1. Facilitate ADA ramps, landings, and connections to existing sidewalks without major roadway construction.
 - a. This scenario will assess the use of retaining walls to elevate or lower sidewalks and connections.
2. Adjust (lower) the grades of Powderhouse Road at the Carlson Street intersection.
 - a. Utility elevations will be assessed to verify any required minimum cover for both public and private utilities.

Carlson Street and Powderhouse Road Intersection Design

Thursday, September 29, 2022

#22.121

- b. This scenario assumes that the Powderhouse Road profile will require adjustment from the north property line of Cheyenne Berean Church, south to the north side of Melton Drive, approximately 1,900'. This will provide for appropriate transition to existing features.
 - c. Approaches and grades from existing structures (residential homes) will be assessed for drainage and functionality.
 3. Adjust (raise) Carlson Street at the Powderhouse Road intersection.
 - a. This scenario assumes that the Carlson Street profile will require adjustment from the east side of the alley approach, approximately 144' from the described intersection.
 - b. Approaches and grades from existing structures will be assessed for drainage and functionality.
 4. Adjust in combination as described in items 1, 2, and 3.

The services required for this Project and included in the proposal, unless otherwise noted, are as follows:

- Survey
 - o Topographic survey
 - Elevations and contours processed
 - Surfacing linework
 - Signage, surfacing and utilities (public and private)
 - o Boundary survey (legal property lines)
 - o Project control points and calibrations
 - o Boundary linework (for potential Right-Of-Way acquisition)
- Geotechnical Investigations (Terracon)
 - o Propose seven borings, 10-15' depth each. These will extend every 270' of surveyed area along centerline of Powderhouse Road, approximately 1,900'
 - o Surfacing recommendations
 - o Soil classifications
 - o Groundwater elevations (if within the boring depth)
- Utility Investigations
 - o Cheyenne Board of Public Utilities water and sanitary sewer main alignments and elevations as existing.
 - o Private Utility locates completed and surveyed
 - Dry utility (Black Hills Energy, Century Link, Spectrum, etc.) communications, electrical and gas alignment and elevations.
 - o Up to five (5) total non-destructive pothole investigations for dry utilities.

**Carlson Street and Powderhouse Road
Intersection Design**

Thursday, September 29, 2022

#22.121

- Traffic Design (Stantec)
 - o Signal Design
 - o Signing and Striping
 - o Geometric Intersection Design (AVI working in collaboration with Stantec)
- One (1) public meeting.
 - o AVI is available to host this meeting at our office which is within walking distance of the Project, and will provide any required exhibits
- 60% - 90% - Final Drawings Submittals
- 60% - 90% - Final Project manual specifications, estimates, schedules, summaries and bidding document support.
 - o AVI assumes the City of Cheyenne will complete the bidding process (advertising, bid opening, etc). AVI will support this role by providing addendum question responses, bid evaluation, attendance of pre-bid meeting, and any supporting documents required for City to complete documentation and bid award.
- Project Bidding by City of Cheyenne
- Construction Management (not included in this proposal)
 - o Project closeout
 - As-builts
 - Closeout documents
 - Final walk throughs and punch lists

The services as outlined above include various meetings, coordination etc. Further details and associated fees can be seen in the attached **Exhibit A**, Proposed Fee Schedule.

AVI understands that design and construction of this Project will have an effect on the current Coyote Ridge project. The project is currently designed to connect to Powderhouse Road as existing. AVI will assess the current Coyote Ridge intersection design (Carlson Street east), include adjustments as necessary, and work to minimize delays as much as feasible. This proposal anticipates that electronic .dwg files are available from others to expedite this incorporation.

The team for this proposed Project has been strategically assembled to facilitate an expedited design phase in order to provide additional construction phase time. This team includes many

**Carlson Street and Powderhouse Road
Intersection Design**

Thursday, September 29, 2022

#22.121

members of the current Powderhouse Road Corridor Study team who are familiar with the site. Proposed team members include:

1. AVI
 - a. Tristan Cordier, P.E. Project Manager
 - b. Christopher Annala, E.I.
 - c. Adam Deschler, P.L.S.
 - d. Craig Cowley, Survey Party Chief
2. Stantec
 - a. Benjamin Weaver, P.E., PLS, PTOE
 - b. Jill Rosselott P.E.
3. Terracon
 - a. Zachary St. Jean, P.E., P.G.

Full team resumes are attached in **Exhibit B**, while subconsultant proposals can be found in **Exhibit C**.

AVI's not-to-exceed fee for this work is **one hundred eighty-nine thousand nine hundred thirty-two dollars and fifty cents (\$189,932.50)**. Once you have reviewed the above scope of services, we would be most interested in assisting you with the successful completion of this project.

If you have any questions, please contact our office at your convenience.

Respectfully Submitted

AVI PROFESSIONAL CORPORATION

A handwritten signature in blue ink, appearing to read 'Tristan Cordier', is written over the company name.

EXHIBIT B: TEAM RESUMES

TRISTAN CORDIER, PE

Civil Engineer & Jr. Principal

tcordier@avipc.com

O | (307) 637-6017 D | (307) 640-1280

Professional Engineer | WY #15931

Credentials | B.S. Civil Engineering, University of Wyoming, 2012; Associates of Engineering Science, Laramie County Community College, Wyoming 2010.

Experience | Construction Administration, Site Development, Drainage, Road Design and Construction, Infrastructure Design and Construction, AutoCAD Civil 3D; Construction Inspections, Surveying

Specialized Training | Certified SWPPP Administrator #000026, Wyoming; Class B Licensed Contractor #CT-22-26419, City of Cheyenne, WY

Years of Experience | 21 (10 yrs with AVI)
Principal 2 yrs

Mr. Cordier is a junior principal and a Civil Engineer in Wyoming (#15931) and Certified SWPPP Administrator (#000026), Wyoming; Class B Licensed Contractor #CT-22-26419, City of Cheyenne, WY. Mr. Cordier's experiences have included credible field work and field design, drafting, and management of many civil engineering aspects. Mr. Cordier has a B.S. Civil Engineering, University of Wyoming, 2012; Associates of Engineering Science, Laramie County Community College, Wyoming 2010.

Mr. Cordier's design experience has included the development of construction drawings, contract documents, storm sewer structures and conveyances, drainage analysis development for large scale residential

developments, water and sanitary infrastructure, transportation, and master planning. Other responsibilities have included coordination and management of sub-consultants, coordination efforts with governmental agencies, and project owners, cost analysis and estimating. Due to his 20 years in the construction industry and being able to speak the "construction lingo", much of his work at AVI has included construction administration and field work. Mr. Cordier has the ability to understand and interpret the project on the ground and facilitate the intent of the project, or to also interpret existing field conditions and facilitate appropriate design improvements. Project tasks include Construction Administration, Site Development, Road Design and Construction, Infrastructure Design and Construction, Construction Inspector, Construction Manager, Surveying.

Christopher Annala, EIT

Civil Staff Engineer

cannala@avipc.com

O | (307) 637-6017 D | (925) 640-2767

Engineer Intern | WY EI # 6649

Credentials | B.S Civil Engineering,
University of Wyoming, 2021

Experience | Construction Management,
Construction Quantities, CADD
Technician, Field Surveying, Construction
Drawings

Specialized Training |

Years of Experience | >1Year all with AVI

Mr. Annala graduated from the University of Wyoming in the Spring of 2021 with a Bachelor of Science in Civil Engineering. Since graduating, Chris has been working full time with AVI as an Engineer In Training (EIT). Since joining AVI, Chris has gained extensive knowledge and judgement that can be applied to his design. This knowledge was first gained while working with the Survey Crew, where they taught him the process of construction, as well as practical things to consider towards design. Over the past year, Chris

has primarily been gaining experience through the overall design phase of projects. His experience has been geared towards site plans, road design, site grading, pond design, construction quantities, and plan and profiles for utilities and roads. He has proven to be an efficient and effective worker and strives to learn more practical and efficient ways to design.

ADAM DESCHLER, PLS

Surveyor & Sr. Principal
Current President

adeschler@avipc.com

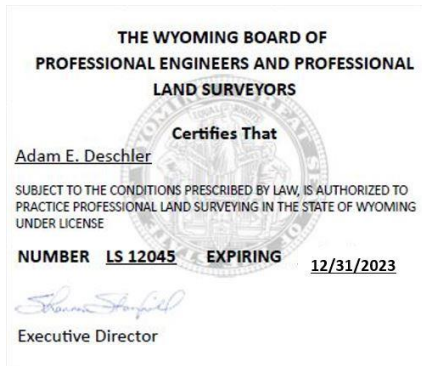

Professional Land Surveyor | WY #12045,
CO#37657

Credentials | B.S. Surveying Engineering,
Alfred State College, NY, A.A.S. Surveying
Technology, Paul Smith's College, NY, FAA
Advisory Circulars 150/5300-16A, 17B & 18B

Experience | Boundary Surveys, Topographic
Surveys, ALTA Surveys, Data Oversight
Conventional & GPS Surveying Equipment,
Construction Staking, AutoCAD Drafting,
Records Research, Crew Supervision /Training

Years of Experience | 25 (11 with AVI) 6 years as
Principal

Mr. Deschler is a Senior Principal and current President of AVI with Professional Land Surveyor licensure in Wyoming and Colorado.

Mr. Deschler's 25 years of experience has played a key role in the innovation of the overall team here at AVI. He maintains positive communication with staff and clients.

As the Department Head for the Survey Department, he schedules field crews and coordinates with contractors to deliver first-rate service in a timely and efficient manner. He oversees all aspects of conducting as-built surveys, construction layout, topographic surveying, including production of stakeout maps and dirt volume calculations.

He manages diverse projects ranging from form land surveys to construction surveys, including topographies and right-of-way surveys, QA/QCs on maps, computations prepared by technician and field crews in collection of field data for topographic surveys for engineering design work. He also processes and analyzes field data for accuracy and compliance with survey requirements.

Mr. Deschler's attends pre-construction meetings, performs pre-calculations, and organizes for the field. Mr. Deschler develops topographic survey maps for design and performs construction surveys and calculations to layout design features, property boundaries, ALTA surveys, roadways, drainage structures, water, and sewer infrastructure, and building layouts.

He also acts as liaison between engineers and field surveyors, analyze field data, adjust horizontal/vertical control. He creates surface models contours, cross sections, volumes, and topographical maps, evaluates field/record data, and produces drawings such as Alta's, Record of Survey, exhibits.

One of Mr. Deschler's many strengths is that he is highly adaptable and self-motivated. He thrives in fast-paced, independent roles demanding sound judgment and an innovative approach to troubleshooting. He is a quick learner who can apply new technology to maximize accuracy and productivity. He is an experienced and effective supervisor who leads with direct communications, has a strong performance under pressure and an exceptional work ethic.

CRAIG COWLEY

Crew Chief & Field Surveyor

ccowley@avipc.com

O | (307) 637-6017 D | (307) 630-6328

Credentials | Associates of Applied Science LCCC, Cheyenne, WY, Survey Certificate of Completion in Land Surveying, University of Wyoming (2012), FAA Advisory Circulars 150/5300-16A, 17B & 18B MSHA Certified Part 48

Experience | Boundary Surveys, Topographic Surveys, ALTA Surveys, Data Oversight, Conventional & GPS Equipment, Construction Staking, AutoCAD Drafting, Instrument Calibration, Records Research, Crew Supervision/Training

Years of Experience | 23 (22 years with AVI)

Mr. Cowley has conducted surveys in numerous counties within Wyoming, Colorado, North Dakota, Western South Dakota, and Western Nebraska. Out of a total of 23 years of experience, 21 have been with AVI providing Boundary, Subdivision Plats, Alta Surveys, Topographic, Construction Staking, Survey Control, Bathymetric and Obstruction Surveys.

Mr. Cowley supervises field crews in collection of field data for topographic surveys for engineering design work. He also processes and analyzes field data for accuracy and compliance with survey requirements. He develops topographic survey maps for design and performs construction surveys and calculations to layout design features, property boundaries, roadways, drainage structures, water and sewer infrastructures, and building layouts. He is well versed in the knowledge

of coordinate systems and vertical data, from which design elements are constructed.

Mr. Cowley's surveys have involved numerous public agencies for City, State, and local municipalities. Projects have involved records of survey, water and sewer rehabilitation, new/old boat ramps, fish hatcheries, subdivisions, water rights, bathymetric surveys, mine reclamation, airport surveys, and other miscellaneous projects around the state.

In addition, he has also conducted topographic surveys for reclamation purposes for phosphate and uranium reclamation, mine pre-construction, as-builts, and post construction quantity verification purposes and various horizontal control, boundary, and topographic surveys throughout Wyoming.

BEN **WEAVER** PE, PLS, PTOE

SENIOR TRANSPORTATION ENGINEER/LAND SURVEYOR

Education

Engineering, Laramie Community
College, 2002

BS, Civil Engineering, University of
Wyoming, 2004

Certificate, Cadastral Surveying,
University of Wyoming, 2018

Registrations

Professional Engineer:
Wyoming, #PE 12374
Idaho, #13965

Professional Surveyor:
Wyoming, #12374
Idaho, #19734

Professional Traffic Operations
Engineer, #3730

Office Location

Cheyenne, Wyoming

Ben has worked in the civil engineering and surveying field for 20 years. He is an expert in urban and rural roadway design, transportation engineering, and traffic analysis. While most of his experience lies within transportation, his experience includes hydrologic assessments, open channel and closed conduit hydraulics, storm drain design, potable water design, sanitary sewer design, lift station design, flood and sprinkler irrigation design, water rights, safety of dams design and permitting, construction administration, public involvement, and cost estimating. The broad base of projects that he has completed allows him to stay diversified and contribute significantly to the services provided to Stantec clients.

EXPERIENCE

Highway 59 Reconstruction* | WYDOT | Gillette, Wyoming | Project Engineer

The project included turn-key design for a section of Highway 59 extending from Interstate 90 to Donkey Creek in Gillette, Wyoming. The project included geometric design, intersection layout and operation items, ADA accessibility, and storm drain design for the first seven lane urban highway section in Wyoming.

Sheridan Avenue Roadway Reconstruction* | WYDOT | Cody, Wyoming | Project Manager, Lead Designer, and Engineer of Record

The project consisted of full reconstruction of the corridor with design including roadway geometric design, intersection utilization analysis and design (including data collection and a left turn lane analysis), ADA accessibility design, vehicle turning movement analysis, signing and striping plans, and pedestrian use accommodation. The project also included development of contractor construction traffic control plans, and design of a solar school zone flashing beacon system. This project incorporated a widened sidewalk on the north side of the roadway to provide accessibility to the new Cody Sunset School which was built adjacent to the upgraded roadway and pedestrian facilities.

Wyoming State Highway 50 and U.S. 14/16 Reconstruction* | WYDOT | Gillette, Wyoming | Project Engineer and Engineer of Record

The project consisted of full reconstruction of the corridor with design including roadway geometric design, ADA accessibility design, vehicle turning movement analysis, signing and striping plans, hydrology and hydraulics for the culvert and storm drain design, and pedestrian use accommodation. The project also included assistance in development of contractor construction traffic control plans.

Wyoming Avenue/Park Area Reconstruction* | City of Sheridan, Wyoming | Project Engineer

Ben was project engineer and lead designer for a 3-phase project consisting of full reconstruction of the roadways and utility infrastructure within a 14-block region of the city with design including roadway geometric design, intersection design, ADA accessibility design, vehicle turning movement analysis, signing and striping plans, pedestrian use accommodation, storm drain design, potable water design, sanitary sewer design, and underground dry utility replacement. The project also included assistance in development and analysis of the application of contractor construction traffic control. The project incorporates updated pedestrian facilities to ensure the entire project area adheres to current ADA guidelines and operates efficiently for vehicles and pedestrians.

*denotes projects completed at previous firm

JILL ROSSELOTT PE

SENIOR TRANSPORTATION ENGINEER

Education

BS, Civil Engineering, Montana State
University, 2008

Registrations

Professional Engineer:
Wyoming, #14495
Idaho, #16612
Montana, #39330

Office Location

Sheridan, Wyoming

Jill is a civil engineer with 15 years of experience as a project manager and project engineer for a broad range of general civil engineering projects, with specialization in transportation and municipal projects. Jill's experience includes project management for municipal design, including roadway reconstruction and utility upgrade projects; design engineer for urban and rural roads; construction oversight and management for roadway designs that include potable water, sanitary sewer, and storm water installations; public involvement for municipal projects; cost estimating for capital improvement budgets and grant funding; permitting for regulatory agencies including WDEQ, WSEO, and USACE; and Federal agency coordination work with agencies such as FEMA, FHWA, and FAA.

EXPERIENCE

Reconnaissance Studies MSA | WYDOT | Statewide

Jill works with WYDOT across the state of Wyoming completing reconnaissance reports for future WYDOT projects. These projects include researching the existing conditions, defining the project scope and design parameters, working with the local stakeholders, and preparation of a final report including estimating the project's design and construction costs.

WYO 50 and US 14/16 Reconstruction* | WYDOT | Gillette, Wyoming | Lead Design Engineer

Jill led the design team for the Wyoming State Highway 50 and U.S. 14/16 roadway design in Gillette, Wyoming for the Wyoming Department of Transportation. The project consisted of full reconstruction of the corridor with design including roadway geometric design, ADA accessibility design, vehicle turning movement analysis, signing and striping plans, hydrology and hydraulics for culvert and storm drain design, and pedestrian use accommodation. The project also included assistance in development of contractor construction traffic control plans.

Sheridan Avenue & 17th Street Traffic Study* | City of Cody Wyoming | Project Engineer

Jill assisted the Traffic Study for the intersection of Sheridan Avenue and 17th Street in Cody, Wyoming. This study was implemented in cooperation between the City of Cody and WYDOT to examine the overall functionality and safety of this busy intersection. Located at the beginning of Cody's downtown historic district, this intersection is responsible for conveying tourist traffic through Cody's downtown district while at the same time providing mobility to local traffic from residential areas to schools and retail districts. We were tasked to examine these factors and take into consideration the public's concern with the safety of the intersection. We implemented a network traffic model simulating the existing and future intersection and surrounding traffic network operations. We worked with WYDOT, the City of Cody, local stakeholders, and the community through workshops and public outreach open houses to investigate possible solutions to address functionality and safety associated with both current and future projected traffic volumes.

*denotes projects completed at previous firm

Zachary C. St. Jean, P.E, P.G.

OFFICE MANAGER

PROFESSIONAL EXPERIENCE

Mr. St. Jean is knowledgeable in the design, construction, reconstruction and construction management of projects including educational facilities, residential and commercial development, power plants, airports, transportation, and various others. He has a thorough knowledge of all AASHTO and ASTM materials testing methodologies including soils, Portland cement concrete, asphaltic concrete pavement, mortar, and grout, and performs a wide variety of inspections that use specialized equipment to carry out unique testing procedures.

Mr. St. Jean also has direct and extensive experience in subsurface geotechnical exploration and analysis, implementation of quality control programs; project cost estimates, analysis of laboratory and field data prior to report generation, and final review of reports prior to submittal. His management responsibilities include monitoring the testing lab's tracking of samples, procedures, and cleanliness, along with scheduling of field and laboratory services.

PROJECT EXPERIENCE

New Cheyenne Regional Airport Terminal – Cheyenne, WY

Project Manager for oversight of construction materials testing and special inspection services for the new Cheyenne Regional Airport Terminal. Terracon's services include earthwork, field observation of reinforcing steel, concrete testing, structural masonry observation, and structural steel inspections. Worked closely with the contractor and Cheyenne Regional Airport personnel to coordinate our testing and close out the project successfully.

Chip Seal Project No. 2 – Cheyenne, Wyoming

Project manager/engineer for plan and specification development for the City of Cheyenne Chip Seal Project No. 2. This project included partial alignments for 9 various streets across the City. Services included performing a pavement condition assessment, providing patching recommendations, development of plans to 100%, review of the City's specifications, and an engineer's estimate.

West Edge Civic Center Commons – Cheyenne, Wyoming

Project manager/engineer for storm water upgrades as part of the West Edge Development. Subsurface exploration was performed on various downtown streets for new storm sewer alignments and within a parking lot for the proposed storm water detention basin. Recommendations will include utility backfill, earthwork, and retaining soil parameters.

Runway 3/21 Rehabilitation – Laramie Regional Airport, WY

Project manager for a geotechnical engineering evaluation for the rehabilitation for the main runway at the Laramie Regional Airport. Exploration services include multiple boring and core locations, overseeing laboratory testing including classification testing, CBRs, corrosion potential, and Proctors. Evaluation of the existing pavement conditions, re-use of existing asphalt, and subgrade preparation per FAA requirements will be performed.

FE Warren Air Force Base, Maintain Base Pavements – Cheyenne, WY

Project Manager for oversight of construction materials testing and special inspection services for the removal and replacement of pavements at multiple sites on FE Warren AFB in Cheyenne, Wyo. Terracon's services include earthwork, field observation of reinforcing steel, concrete, and hot-mix asphalt (HMA).

State of Wyoming Capitol Renovation Project – Cheyenne, WY

Senior Project Manager for the renovation of the historical State Capitol building and adjacent Hershler Building. Since Zach's involvement on the project he has overseen and assisted with micropile and underpinning design, cracking monitoring installation and monitoring, and on-going special inspection and construction material testing. Micropile and underpinning design has consisted of collaborative effort with the contractor, design team and State to underpin 100+ year old foundations to allow for installation of modern mechanical systems.

EDUCATION

Bachelor in Geology, University of Northern Colorado, 1999

Montana Tech/Master in Geological Engineering, 2002

ASFE Fundamentals of Professional Practice (FOPP) Class 20 Graduate

REGISTRATIONS

Professional Engineer
Wyoming #15405

RE: Carlson St & Powderhouse Rd Signal Design

Tristan Cordier,

Below please find Stantec's proposed scope of work and fee for the design of a traffic signal at the intersection of Carlson Street and Powderhouse Road in Cheyenne, Wyoming:

SCOPE OF SERVICES

Carlson St & Powderhouse Rd Signal Design Phase

Task 1: Project Management and Meetings

- This effort will include the overall management of the project as well as meeting attendance as described herein.
 1. Kick-off Meeting - Attend one project kick-off meeting.
 2. Project Meetings – Up to four (4) project progress/coordination meetings.
 3. Design Review Meetings - It is anticipated that two (2) project review meetings will be required: 60% Design Review, and 95% Design Review.

Task 2: 60% Preliminary Design

- Designs for pole and mast-arm traffic signal will be prepared, including showing pole type and locations, signal face locations, intersection striping, location of utility points, location of existing and proposed utilities adjacent to the project, and proposed pull box locations. It is assumed that the traffic signal equipment can be adjusted such that there are no utility relocations required.
- Develop a set of 60% preliminary plan sheets to be incorporated into AVI's plan set meeting City requirements. The sheets will include general notes, individual quantity tabulations, signal plans, and signing/stripping plans.
- Develop, as necessary, preliminary project special provisions related to the scope of design items.
- Prepare an opinion of probable cost for materials and labor of the traffic signal and intersection striping. Where applicable, City standard pay items shall be the basis for the engineer's estimate, however other available cost data information will be used as cost sources to prepare the Engineer's estimate.
- 60% preliminary design submittal package shall include a digital (pdf) copy of the half size

(11" x 17") plan sheets, special provisions (if any) and cost estimate to be incorporated into AVI's project plan set.

Task 3: 95% Final Design

- Based on comments received from the preliminary design phase, the design will be advanced to the 95% level. The 95% set of plans will finalize all design elements from the 60% design as well as add any additional sheets required to construct the proposed improvements. The project special provisions and construction cost estimate will also be finalized.
- 95% Final Design submittal package shall include a digital (pdf) copy of the half size (11" x 17") plan sheets, special provisions (if any) and cost estimate to be incorporated into AVI's project plan set.

Task 4: Construction Documents

- Based on comments received from the final design phase, the design will be completed, and construction documents will be developed.
- Incorporate any comments received at the final design review meeting into the design plans and project special provisions.
- Finalize the engineer's estimate of the probable cost to construct the traffic signal.
- Submit final certified design plan sheets to be incorporated into AVI's project plan set.

Carlson St & Powderhouse Rd Signal Design Bidding and Construction Phase

A scope and fee for Stantec's support during the bidding and construction phase of the project will be prepared at a later date once the schedule for construction is known.

ASSUMPTIONS & LIMITATIONS

The proposed scope, schedule, and fees are subject to the following conditions, limitations, and assumptions:

- AVI PC will prepare all meeting agendas and meeting minutes.
- AVI PC will provide the necessary geotechnical investigation finds and recommendations to be utilized in design of the traffic signal foundations.
- AVI PC will provide the necessary engineering and property survey data to be utilized in the siting and design of the signal. This will include the topographic survey, project survey control, and right-of-way survey.
- AVI PC will be responsible for and obtaining all utility locates within the project area and provide the necessary information as it relates to the location of the traffic signal design, including but not limited to Subsurface Utility Engineering (SUE) of potential utility conflicts.
- No additional traffic data will be collected. Existing data available from the City along with data collected as part of the Powderhouse Road Corridor Study will be used for this project.
- The geometry and lane configuration for the Carlson Street and Powderhouse Road intersection will come from the Powderhouse Road Corridor Study and the signal design will be developed based on the Corridor Study's recommendations.

- The signal design will conform to the following standards:
 1. Federal Highway Administration (FHWA) Manual of Uniform Traffic Control Devices (MUTCD).
 2. City of Cheyenne and BOPU Standard Specifications Design Standards.
 3. American Association of State Highway Transportation Officials (AASHTO) Roadside Design Guide.
- AVI PC will be responsible for the design and preparation of the geometric roadway design plans and ADA pedestrian and sidewalk connection plans to meet applicable requirements.

FEE FOR SERVICES

Stantec will perform such services outlined in this scope of work on a time and materials basis not to exceed Design Phase **\$86,894.00** and Bidding and Construction Phase **\$ TBD**.

SCHEDULE

Stantec will initiate services upon receipt of Notice to Proceed (NTP) from AVI PC.

- **Kick-off-meeting** – within 10 business days of NTP.
- **60% Design** – 90 calendar days from receipt of geotechnical data, survey data, and the corridor study recommendations.
- **95% Design** – Within 45 calendar days of receipt of all comments on the 60% plans
- **Construction Documents** – Within 45 days of receipt of all comments on the 95% plans.

This proposal is valid for 60 days from the date of submission. The contents of this proposal **may not be divulged to any third party** without Stantec's written permission.

If AVI PC is amenable to proceed with this work as proposed above, please provide a draft subcontract agreement along with AVI PC's executed agreement with the City of Cheyenne for our review.

Stantec appreciates the opportunity to provide professional services to AVI PC. If you have any questions, please contact the undersigned at your convenience.

Sincerely,

Benjamin E. Weaver PE, PLS, PTOE

Senior Transportation Engineer / Land Surveyor
